

POLY-KLYN

company
presentation

Poly-Klyn was created in 1994 to meet the demands of a new and growing market. The experience in the world of portable sanitation gradually accumulated during these years has enabled us to create our own products to improve the industry's shortcomings, which can be easily pinpointed in the various areas, including leisure (such as beaches, parks and events) and work (mainly construction). We place ourselves at the disposal of the users of such places, who will be grateful to be able to use clean and hygienic toilets anywhere and at any time.

Poly-Klyn offers a full service, since our team can meet all your needs, using the most effective logistic resources to do so: our operators use tanker lorries, 4x4 vehicles, platforms with cranes, and vans with cleaning equipment and workshops, in order to provide you with the best transport, maintenance and cleaning service 365 days a year.

In addition, thanks to the collaboration of our technical and sales departments and backed by our experience, our customers' specific needs can be embodied in concrete, tailor-made projects resulting in custom-made services or products.

POLY-KLYN and the quality:

Poly-Klyn is certified with the quality rule ISO 9001, which assures the required quality standards, providing a continuous updating of our internal procedures.

* Design, production and commercialization of portable sinks.

Our logistic bases and official distributors, as well as a consolidated cooperators net, allow us to be nearer of you:

Logistic bases

Associations...

Poly-Klyn and other Spanish portable sanitation companies have created the Spanish Environmentally-Friendly Portable Sanitation Association (*Asociación Española del Sanitario Portátil Ecológico*), an organisation created to uphold and promote the industry, as well as to increase its professionalism and improve the conditions of the Spanish portable sanitation industry.

In addition, **Poly-Klyn** is a member of the UK-based Portable Sanitation Europe (**PSE**) association and the US-based Portable Sanitation Association International (**PSAI**), and our employees are certified by the latter's seal of quality (the PSAI Health and Safety Worker Certification Program), thus providing the degree of excellence required by our more than 6,000 customers.

Advanced societies have a clear awareness of the need to protect public health and the environment, and **Poly-Klyn** has a clear commitment to their preservation.

Our stand-alone portable toilets contribute to this protection by adequately treating faecal matter in temporary or permanent locations in which it is not possible to have facilities connected to the public sewerage system.

Poly-Klyn has obtained from the appropriate administrations the necessary permits to treat the wastewater resulting from the use of our toilets.

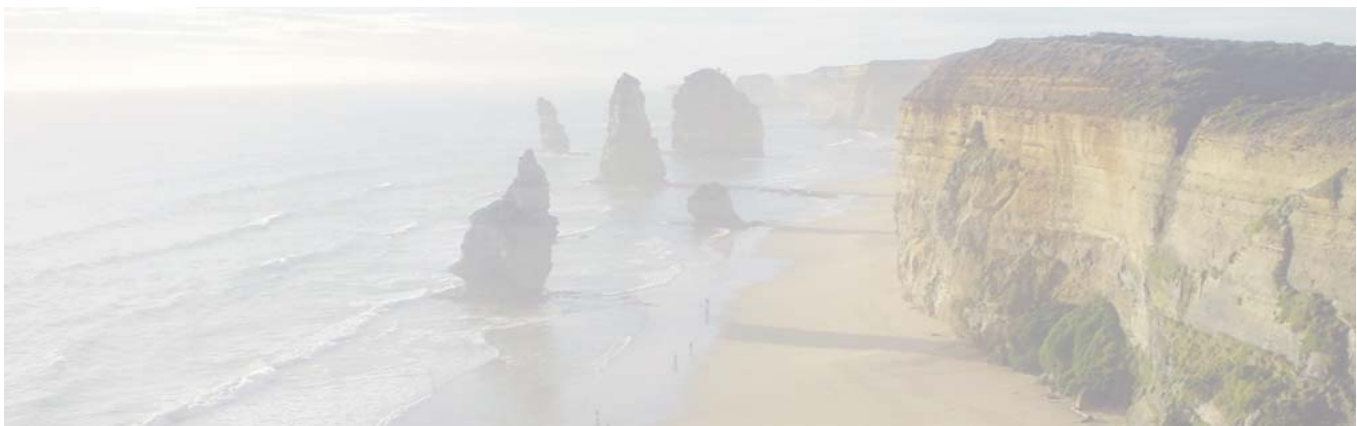

In addition, our vehicles have received official approval and are in compliance with the legislation on the transport of non-hazardous waste.

Poly-Klyn actively collaborates to preserve the most precious natural resource, water, an increasingly scarce resource. And we are able to achieve this thanks to our stand-alone toilets' internal filtering, pumping and recirculation system which, together with the use of biodegradable disinfectant, prevents the continuous water consumption typical of toilets with traditional cisterns.

PK and the environment

A good illustration of the water saved by our toilets can be provided by comparing the litres used by a conventional toilet with the litres consumed by a **Poly-Klyn** stand-alone toilet after the same number of flushes:

	Conventional toilet	Poly-Klyn autonomous toilet
Tank capacity	8 liters of water	25 liters of water + 1 liter of neutralizer liquid
Uses	750	750
Total litros poured	6.000 liters	25 liters

Poly-Klyn's second line of business is sales, an activity which is clearly growing due to the various needs increasingly arising in this market.

We cover the needs, especially in Spain and increasingly abroad, of very different companies and organisations (construction, army, restaurants, rental companies, marinas, town halls, etc.) which have found our products to be the perfect solution to their sanitation equipment needs (including toilets, showers, sinks, changing rooms and maintenance systems, among others).

Customers purchasing **Poly-Klyn** stand-alone sanitation units are offered the chance to avail themselves of our **MAINTENANCE SERVICE**, which involves using our teams of professionals and appropriate tools and vehicles to empty tanks, clean the units and replace neutralising, deodorant, air freshener and other liquids.

In addition, our **AFTER-SALES SERVICE** will provide you with quality technical support to solve any possible contingency which may arise in the use of our units as quickly as possible.

Ecologic portable toilets

- portable toilets (connected to the net or chemicals)
- combined boxes (toilet, shower and sinks)
- Shower boxes
- wardrobe boxes
- double and multiple sinks
- luxury sanitary trucks
- a range of boxes for the handicapped

Others

- adaptation kits for portable toilets
- liquid pouring pumps
- cleaning sets
- air fresheners, deodorizers and other
- signaling fences
- decontamination mobile units (asbestos)

Our products

Rental is our main line of business, operated only in Spain. In order to provide this service, we have 18 branches in Spain, with a team of more than 140 people and a fleet of 80 vehicles, to deliver, collect, empty and clean the units.

We cover distinct sectors:

- construction
- events
- beaches
- fields (agriculture sector)

Our wide range of toilets is designed to meet all temporary or isolated requirements, perfectly serving various groups of people brought together by celebrations, holidays, tradition, sport, work or commercial reasons, among others, in places and situations including:

- Sports events
- Work sites and construction sites
- Local festivities
- Camping sites and summer camps
- Beaches
- Car parks
- Mountain shelters
- Touring exhibitions
- Open air concerts and recitals

- Natural parks
- Parks and gardens
- Ski slopes
- Marquees, circuses, etc.
- Shopping centres
- Markets
- Meetings
- Youth forums, religious events, etc.

Rental

Sporting events, huge concerts, celebrity visits, political events, opening ceremonies... all these events attract large numbers of people, and the success of an event is to a great extent dependent on **these people staying at the event.**

To ensure that this is the case, you must be able to meet their **basic needs**, which include having near and available to them a set of **clean and comfortable toilets**, in sufficient quantity to enable them to use them without a long wait.

We have been present at many events of many different types since the beginning, both locally and nationally, renting out our portable toilets and providing our maintenance (tank emptying and replacement) and cleaning services.

Year after year, we have proven our professionalism in events including:

- **La Mercè** (Barcelona's local celebration) (411 units in 2007)
- **Benicàssim Festival**
- **Summer Case Festival**
- **Cheste Racetrack**
- **Vuelta Ciclista a España** (Cycling Tour of Spain)
- **Pope Benedict XVI's visit** to Valencia in 2006 (3,000 units)
- **Prince Felipe's** (2004) and **Princess Cristina's** (1997) weddings, and many other events.
